

Dr. Jim and Dr. Tom make going to the dentist something you look forward to! (L to R: Jim Amstadt & Tom Katz)

Big Challenges, Great Results

THE DENTISTS AT DENTISTRY OF WISCONSIN ARE PURVEYORS of hope. Their patients often arrive thinking nothing can be done to resolve their dental problems, but Dr. James Amstadt and Dr. Tom Katz know they can help anyone. With strategies for everything from missing or broken teeth, discoloration, pain, and difficulty chewing or speaking, Drs. Amstadt and Katz have restored hope and beautiful teeth to people who had all but given up.

"There's always a solution for everyone," Dr. Amstadt says.

Equipped with the latest technology and training, Drs. Amstadt and Katz offer the highest quality services, including implants, same-day veneers, dentures, tooth-colored fillings, whitening and more. They also offer routine dental care. After all, who better to take care of your dental work than the dentist responsible for it?

The doctors know that accessibility is important, so they plan their calendars to work patients in quickly once they decide on treatment plans. The doctors also reserve time in their schedules for new-patient consultations, some of which take an hour or longer. "We want people to feel really comfortable. We want them to be well informed," Dr. Katz says, "because when we're finished, we want them to be completely satisfied with the work we've done."

Their patients are satisfied. Many are moved to tears when they see their results. And each problem solved is a thrill for the doctors, too. "The results we can get are amazing," Dr. Amstadt says. "There's a lot of happiness when we are done both for the patients and for us."
